DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Drawings

2. Drawings filed on 9/28/04 have been accepted.

REASONS FOR ALLOWANCE

3. The following is an examiner's statement of reasons for allowance:

There was no prior art found by the examiner that suggested modification or combination with the cited art so as to satisfy the combination of all the limitations in claims 1, 7 and 13-18.

As to claims 1, 7, 14, 16, the prior art of record, taken alone or in combination, fails to disclose or render limitations **“the design lens dioptric power distribution calculation step of calculating a dioptric power distribution of the design lens spatial model on the basis of the calculated optical paths of the exit light beams”** and **“the error distribution calculation step of calculating an error distribution of the dioptric power distribution of the target lens with respect to the dioptric power distribution of the design lens spatial model”**, in combination with the rest of the limitations of claims 1, 7, 14 and 16.

As to claims 13 and 17, the prior art of record, taken alone or in combination, fails to disclose or render limitations **“calculating a design lens dioptric power**

distribution from design values for the ordered lens based on the order data” and “evaluating the lens by calculating an error distribution of an actual dioptric power distribution with respect to the design lens dioptric power distribution”, in combination with the rest of the limitations of claims 13 and 17.

As to claims 15 the prior art of record, taken alone or in combination, fails to disclose or render limitations **“calculating a design lens dioptric power distribution from design values for the ordered lens based on the order data” and “evaluating the lens by calculating an error distribution of an actual dioptric power distribution with respect to the design lens dioptric power distribution”, in combination with the rest of the limitations of claims 15.**

As to claim 18, the prior art of record, taken alone or in combination, fails to disclose or render limitations **“design mold dioptric power distribution calculation means for calculating a dioptric power distribution of the design mold spatial model on the basis of the calculated optical paths of the exit light beams” and “error distribution calculation means for calculating an error distribution of the dioptric power distribution of the target mold with respect to the dioptric power distribution of the design mold spatial model.”, in combination with the rest of the limitations of claims 18.**

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
